Dear Sir/Madam,

Regulation (EC) No 852/2004 applied by Regulation 19(1) of the Food Safety and Hygiene (England) Regulations 2013
Health & Safety at Work etc Act 1974,
Re: Mendys, 17-19 Edgwarebury Lane, Edgware, Middlesex, HA8 8LH

Further to my programmed Food Hygiene inspection to the above premises on 12th August 2019, when I found that the Kitchen was closed for 3 weeks, I spoke with [REDACTED] during my visit. I write to clarify the matters that require your attention:

1. Sushi Preparation Area

- The sushi fridge temperature was found to be 6 to 7°C that is higher than the recommended of 5°C for good practice. In addition to which the morning delivery of fresh Tuna fillets to be frozen at -20°C was kept in this fridge until it could be transferred to the Freezer. The Freezer however, was found to be in a poor condition of repair and maintenance, and not operating at the correct temperature.
- pH monitoring of Sushi rice was not being recorded – therefore your FSMS are not being implemented.

Action Required

[REDACTED] agreed that the Tuna Sashimi would not be sold until the cold storage facilities had been repaired. Please let me know when the repairs have been completed.

Provide and implement suitable pH monitoring of the Sushi-rice.

2. Temporary first floor Kitchen

The floor covering was worn through wear and tear.

Action Required

Carry out the necessary maintenance to the kitchen floor covering this must be completed, prior to the re-opening of the kitchen. Floor coverings must be smooth, hard,

Yours sincerely
