

How to search the planning register

www.barnet.gov.uk/planning-and-building/planning/submit-planning-application

All the requested documents will be online, to search I suggest the following

As there is no way for us to identify particular applications that have had a parking survey. Each application needs to be searched individually, planning would only ask the highways team to carry out a parking survey on large scale applications or minor applications the search can be narrowed down to those application types.

To carry out the search please follow the instructions.

In the advance search option on the Planning public access website, link below:

<https://publicaccess.barnet.gov.uk/online-applications/search.do?action=advanced>

In the Development type field search for Large Scale and Minor Applications (any type within those parameters):

Development Type:	<div>All ▼</div>
-------------------	------------------

Add the dates you would like to search from an to in the date validated field:

Date Validated:	<div></div>		to:	<div></div>	
-----------------	-------------	---	-----	-------------	---

You will need to access each application individually and search the documents to see if there is a parking survey.
