Importance: High

Dear Sir/Madam

'Lahore', 39 Station Road, Edgware, LONDON HA8 7NX

I am writing to inform you about a partially blocked exit from the rear of a food business

and to give you some details and attach some photographs.

I carried out a food hygiene inspection on 19 October 2016 at a takeaway called 'Food

Delicious' at 33 Station Road, Edgware LONDON HA8 7NX

The food business operator there is [REDACTED]. A rear door from her kitchen

leads to a corridor which is under a wooden roof built over the rear yard by the business

next door but one – 'Lahore'.

See attached photograph taken from Google street view, which shows the front of the

premises. The rear of 'Lahore' wraps around behind the business in the middle ('Falafel') and has a rear exit door which opens into the corridor behind 'Food Delicious'.

The corridor which [REDACTED] must use to gain access to the rear alleyway where

her bin is located, is partially blocked with equipment from 'Lahore'. I noted that the corridor was poorly lit.

See photographs of the corridor and other photographs showing the extent of the plywood extension at the rear of 33 and 37 Station Road. You will see that this wooden

addition to the building extends over two floors.

My concern is that in the event of fire in either 'Lahore' or 'Food Delicious' the food business operators and staff would encounter difficulty making their escape from the building because of the equipment in the corridor.

I would be grateful if you could visit to assess and if possible, secure an improvement in the situation.

Thank you in advance for your assistance.
