

Cycle Routes 13263492

1. Where possible, the amount of miles of dedicated cycle routes in existence in your local authority area on 28/10/2024.

Approximately 27.5 miles.

Note: This figure is an estimate based on review of a 2018 audit (which may be incomplete) and known changes. We have interpreted "dedicated" cycle route to mean a route that does not allow motor vehicles. The response therefore excludes routes signed along a carriageway without a cycle lane, or routes that are also bus lanes, but includes shared use routes, including paths in parks and public rights of way that permit cycling (e.g. bridleways/restricted byways) even though some routes may not be explicitly signed. The figure includes routes on both the borough road network and Transport for London Road network .

2. Where possible, the amount of miles of cycle routes established in the past 6 years in your local authority area with a breakdown for each calendar year. This time period should include (01/01/2018-01/01/2023) and where possible (01/01/2024-28/10/2024).

3. Where possible, the amount of money spent on cycling infrastructure in the past 6 years in your local authority area with a breakdown for each calendar year. This time period should include (01/01/2018-01/01/2023) and where possible (01/01/2024-28/10/2024).

4. Where possible, the amount of money spent on cycle and scooter share schemes in the past 6 years in your local authority area with a breakdown for each calendar year. This time period should include (01/01/2018-01/01/2023) and where possible (01/01/2024-28/10/2024).

We do not have records by calendar year, but have provided information based on the April-March financial year where available.
